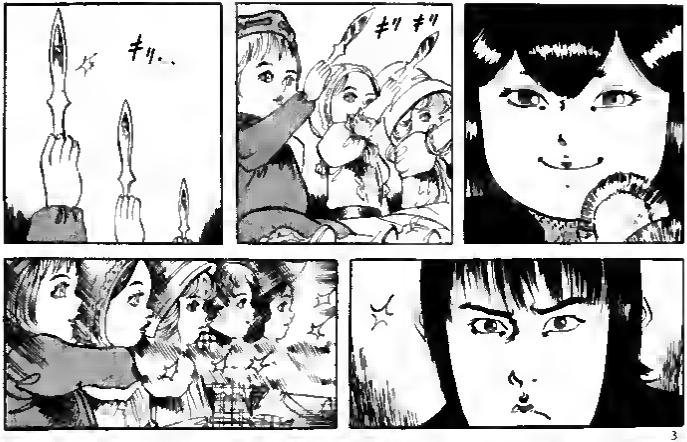
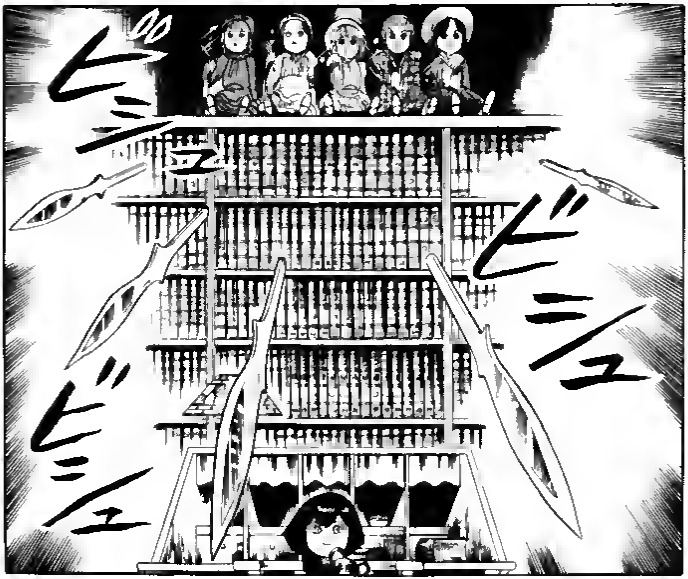
Defense.51
セイレーンの魔女 II
—Seiren 2—

I can go forward, stop, and be late, but not walk or run. What am I?
.....
A train ...

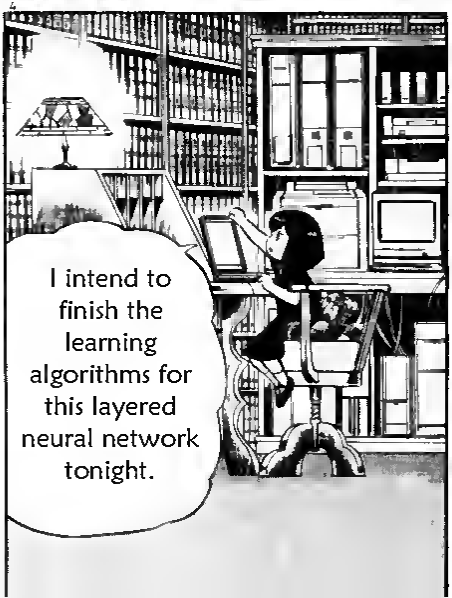


3



The answer is... "a clock"!

Kuh...



I intend to finish the learning algorithms for this layered neural network tonight.

I'm busy, so please leave.

Persistent, aren't we; okay, I'll grant you just one more chance.
What am I?
Your eyes can't see me, but I'm right in front of you. When you touch me with your hand, I turn into something else, and you absolutely cannot catch me...
Wh ..?!

I am the "protector" who was asked here to guard you!
How many people have you done this to so far?

Wh-what are you going to do?!
I don't yet know why you're confined here.
すっく
But, before I talk business, it seems there's something I must do.
If children do bad things, you spank them!
Let me go ...!!
No ...!!
Eek ...!!

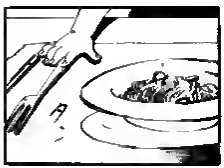
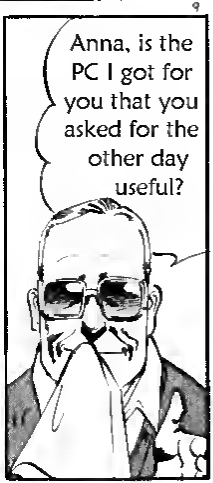
カチャ
カチャ



Please excuse me; I don't have much of an appetite.

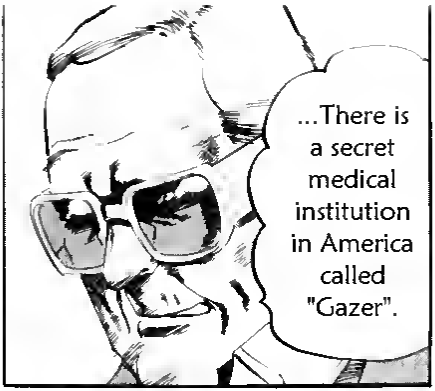
It appears I'll be able to implement the Turing system I wanted to create on those specs ...
I'm grateful, Grandfather.

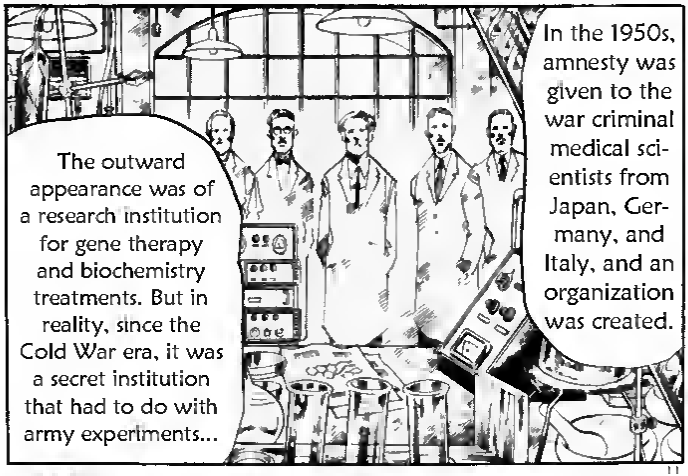


Anna, is the PC I got for you that you asked for the other day useful?

バタン
They eloped, and that girl was born in America.
The father is Japanese like you. He was a physician by the name of Kouichi Kitagami.
My grandchild. My third daughter Amelia's child, name of Anna, six years old.
10
ア！
She died last year.
And Amelia-sama?

TL- furigana says "someone who stares"



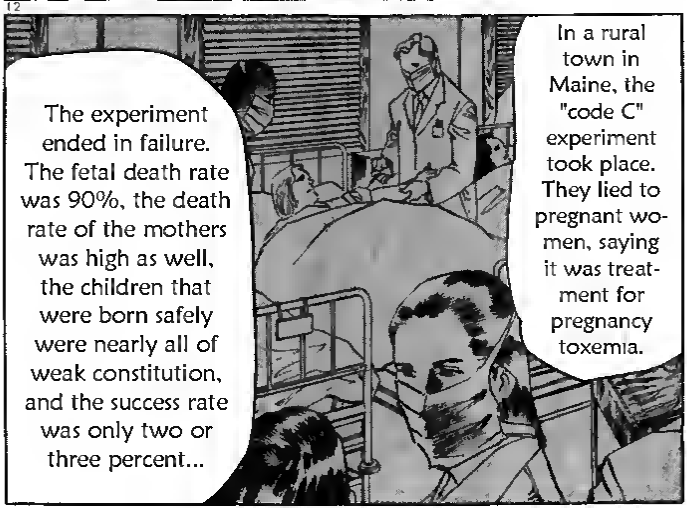


In the 1950s, amnesty was given to the war criminal medical scientists from Japan, Germany, and Italy, and an organization was created.
The outward appearance was of a research institution for gene therapy and biochemistry treatments. But in reality, since the Cold War era, it was a secret institution that had to do with army experiments...

So, if you biochemically interfere with the brain's development at the fetal stage...
Human brain cells are all created during the fetal stage and, after that, never increase.

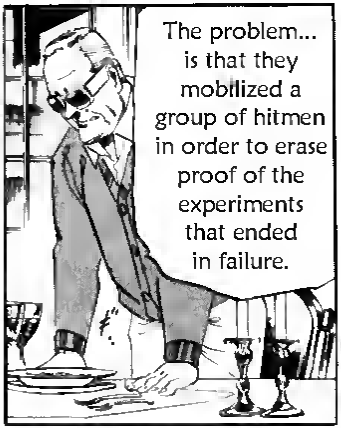
...It was that sort of research.
you could manufacture people of unnaturally high intelligence.

12

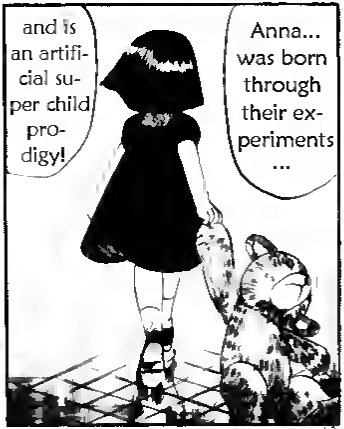


The experiment ended in failure. The fetal death rate was 90%, the death rate of the mothers was high as well, the children that were born safely were nearly all of weak constitution, and the success rate was only two or three percent...
In a rural town in Maine, the "code C" experiment took place. They lied to pregnant women, saying it was treatment for pregnancy toxemia.

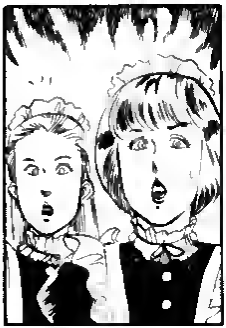
was Amelia, who ran away to America, lived in that rural town, and became pregnant with Anna.
As it happened, in that percentage...

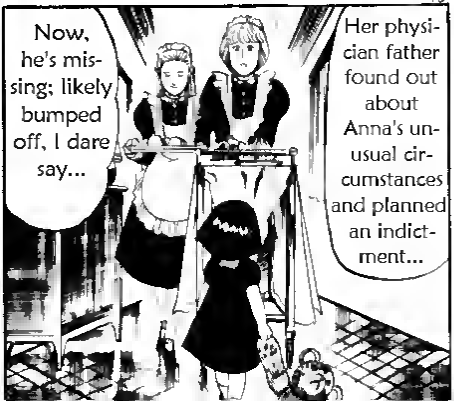


The problem... is that they mobilized a group of hitmen in order to erase proof of the experiments that ended in failure.



and is an artificial super child prodigy!
Anna... was born through their experiments...

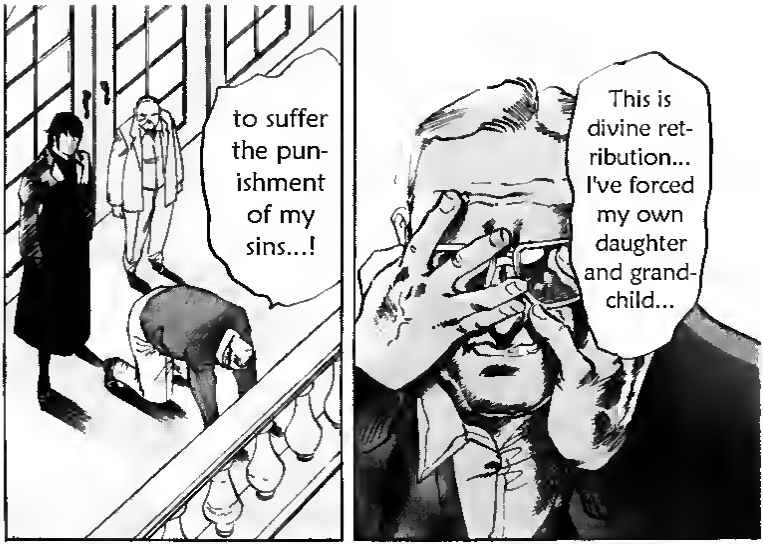




Now, he's missing; likely bumped off, I dare say...
Her physician father found out about Anna's unusual circumstances and planned an indictment...

The child was entrusted to me immediately afterward.
And Amelia didn't have time to come home to Sicily before she was shot and killed by someone...
Since her mother died, she secludes herself in the inner rooms of the house, not opening her heart to anyone...
I've continued to hide her existence from the outside world this whole time.
14
Because I have a source ...
classified information?
Heheh... it's strange, isn't it, why I'm so well-informed on so much...

capital contri-buter ...
Because "Gazer's" initial funding ...
was none other than us, the Cosa Nostra...!
15
In those days, we thought the organiza-tion couldn't survive in America with-out those sorts of under-ground dealings...



to suffer the punishment of my sins...!
This is divine retribution... I've forced my own daughter and grandchild...
16

you, a man who comes from the same country as her father.
I want you to protect her...

コッ
コッ
キィ…
Although he is always summoned during a tea ceremony, he is only allowed to drink hot water; who is this pitiable person?
17
I'm undertaking your protection. I wanted to report that.
What is your business?
A teapot.

What is it?
"Your eyes can't see me, but I'm right in front of you. When you touch me with your hand I turn into something else and you absolutely cannot catch me"...
Do you remember? About six months ago, we first met at the Teatro Greco ruins in Taormina...
and you gave the same riddle today as you did then?
I'll give you an answer... a "dream", or the "future".
.....
Good night.

Incorrect.
No matter what answer you give for that riddle, it will be incorrect.
Perpetually.
You'll regret this... because I'm a "witch"! Because I'm a "siren"!
Everyone who gets close to me dies... like Papa... and Mama... and you!

Cleaner/Typesetter: Pom Rania

Bored now.
grr
I'm gonna upload the whole scene to Youtube!
You too can be an internet celebrity, if you fail amusingly enough.
Good thing I taped it all.
